

Christian Ludovic Talekeufouet

📍 Gümüşhane, Turkey

💼 Web Developer / Software Engineering Student

Hello, I'm a web developer with over a year of hands-on development experience — I'm a fast learner and adapt even faster! I'm available for a part-time position or a fully remote internship.

Experiences

YB Digital • Frontend Developer (Internship)

November 2024 - February 2025

I joined YB Digital as a Frontend Developer Intern, within the web development team of a digital agency specialized in creating custom digital solutions (showcase websites, e-commerce platforms, internal tools, etc.).

This experience allowed me to work in a dynamic professional environment, adapting to tight deadlines, high expectations, and close collaboration between design, development, and project management teams.

My main responsibilities included:

- Contributing to the redesign of the agency's website using Next.js.
- Integrating responsive user interfaces provided by the design team.
- Participating in the creation of a reusable and accessible component library, with a focus on performance.
- Taking part in collaborative workflows using Git (issue tracking, pull requests, code reviews, etc.).

Ejara Cameroun • Product Designer (internship)

October 2022 - March 2023

I joined Ejara as a Product Design Intern within a passionate product team dedicated to democratizing savings and investment in Africa through blockchain technology. Ejara is a mobile application that enables users to invest in cryptocurrencies and secure their assets in a simple and accessible way.

My main responsibilities included:

- Building a cohesive design system for the existing application to ensure a unified and scalable interface.
- Analyzing user journeys and proposing UX/UI improvements to enhance usability.
- Designing the desktop interface for Ejara Prime, ensuring responsiveness and visual consistency.
- Participating in user research for the upcoming version 3 (interviews, needs analysis, insights synthesis).

This internship gave me a 360° view of how a tech product operates within a company, and allowed me to experience in-person collaboration within a cross-functional team. It also helped me gain a deeper understanding of the interdependence between research, product strategy, and design execution.

Skills

Web, UI/UX, Laravel, Livewire, VueJs, ReactJs, NextJs, Tailwind css, Responsive Design, Prototypage.

Languages

- French: Nativ
- English: B2 level
- German: Certificat Goethe B1
- Turkish: Certificat C1

Glom sarl • Junior Web Designer

January 2022 - July 2022

As a Web Designer at Glom Cameroon, my main responsibilities included:

- Designing website mockups for clients based on specifications defined in collaboration with the client and the CEO.
- Setting up a design system (mainly a UI Kit) to ensure visual consistency across the company's projects.

This first remote work experience helped me become familiar with the benefits and challenges of working from home, particularly in a demanding environment marked by frequent power outages and internet connectivity issues. It allowed me to develop strong autonomy, a rapid adaptability, and an effective approach to asynchronous teamwork.

Projects

Uneeze • personal project

March 2025

A small tool I created to help users unsubscribe from unwanted newsletters and intrusive mailing lists. It works in just three simple steps:

1. Connect your Gmail account
2. Select the unwanted newsletters or mailing lists
3. Unsubscribe

Link : <https://github.com/christianLudovic/uneeze>

Tech stack : Vue js, Laravel, Inertia js

Epicerie Afro-can • client project

January 2025

Design and development of a web application for a grocery store, built for a Canadian client. The app allows users to check product availability, leave reviews for stores, and easily contact the store owners..

Link : <https://epicerieafrocan.com>

Tech stack : Next js, Prisma, Supabase

Subscribe • personal project

March 2024

Subscribe is a platform that helps users track, organize, and manage all their digital subscriptions (e.g., Netflix, Spotify, Deezer) in one place, with features like renewal reminders and spending overviews.

Link : <https://subscribe-ui.vercel.app>

Tech stack : React js, Laravel, MySQL
